# Shopping, *by voice.*

One sentence, a whole list — and named lists for travel, hardware, anything.

A voice command guide from VoiceFirstPlanner

FREE

Rattle off everything at once and the app splits it into separate tick-boxes. Name a different list and it'll keep them apart.

### 1 · Add to your shopping list

List as many items as you like in one breath.

 "Add milk, eggs and bread to my shopping list"

 "Add bananas, yoghurt, coffee and oats to my shopping list"

**What happens:** Each item becomes its own tick-box. Separate them with "and", commas, or "plus".

### 2 · Add to a named list (Premium)

Say a different list name and it's created on the spot.

 "Add sunscreen and a beach towel to my travel list"

 "Add nails and a paintbrush to my hardware list"

 "Add napkins and candles to my party list"

**What happens:** The named list is created automatically and the items drop straight in. Named lists are a Premium feature.

#### GOOD TO KNOW

- "To my shopping list" is optional on the main list — "add milk and eggs to my shopping list" works fine.
- For a named list, say its name: "...to my travel list", "...to my hardware list".

PREMIUM

## Go unlimited

**Free includes one shopping list.**

Premium unlocks unlimited named lists — travel, hardware, party, work — each created the moment you say its name, on up to 2 devices.

**\$9.99 value — free download. Premium from \$7.99/mo · or \$99 once for lifetime (first 1,000 members).**
